PROFILE INFO

I am a dynamic and results-oriented Software Engineer with a proven track record of success at Momentum Metropolitan Holdings, a leading financial and insurance company. My expertise lies in developing innovative software solutions utilizing a diverse skill set and hands-on experience with cutting-edge technologies. With proficiency in programming languages such as Node.js, Java, JavaScript, and Python, coupled with extensive experience in UI development using Angular and React.js, I bring a wealth of knowledge to any software development project. My commitment to continuous learning and professional development has led me to acquire skills in DevOps practices, including Docker, Kubernetes, AWS, and Jenkins, enabling me to streamline the software development lifecycle and accelerate project delivery. Moreover, my proficiency in Flutter and Dart allows me to build cross-platform mobile applications with unparalleled efficiency and functionality. I am well-versed in Agile and Scrum methodologies, having successfully collaborated with cross-functional teams to deliver high-quality products within tight deadlines. My strong problem-solving abilities, coupled with effective communication skills, enable me to navigate challenges seamlessly and drive project success.

EXPERIENCE

2023 - PRESENT

Momentum Metropolitan Holdings

Software Developer

- At Momentum Metropolitan Holdings, a prominent financial and insurance company, I played a vital role in several impactful projects. My responsibilities included leveraging a diverse range of technologies such as Node.js, Java, UI development (specifically Angular), Kubernetes, Docker, AWS, and Jenkins. Through hands-on experience and collaboration with the team, I gained valuable insights into software development practices within a corporate environment, further enhancing my skills and knowledge in the field.
